
A BLOCKCHAIN FOR IPOs

The problem in today's equity market, and how we use blockchain to solve it.

Anish Malladi

Kevin Yao

THE PROBLEM

Expenses as a percentage of base deal^[3]

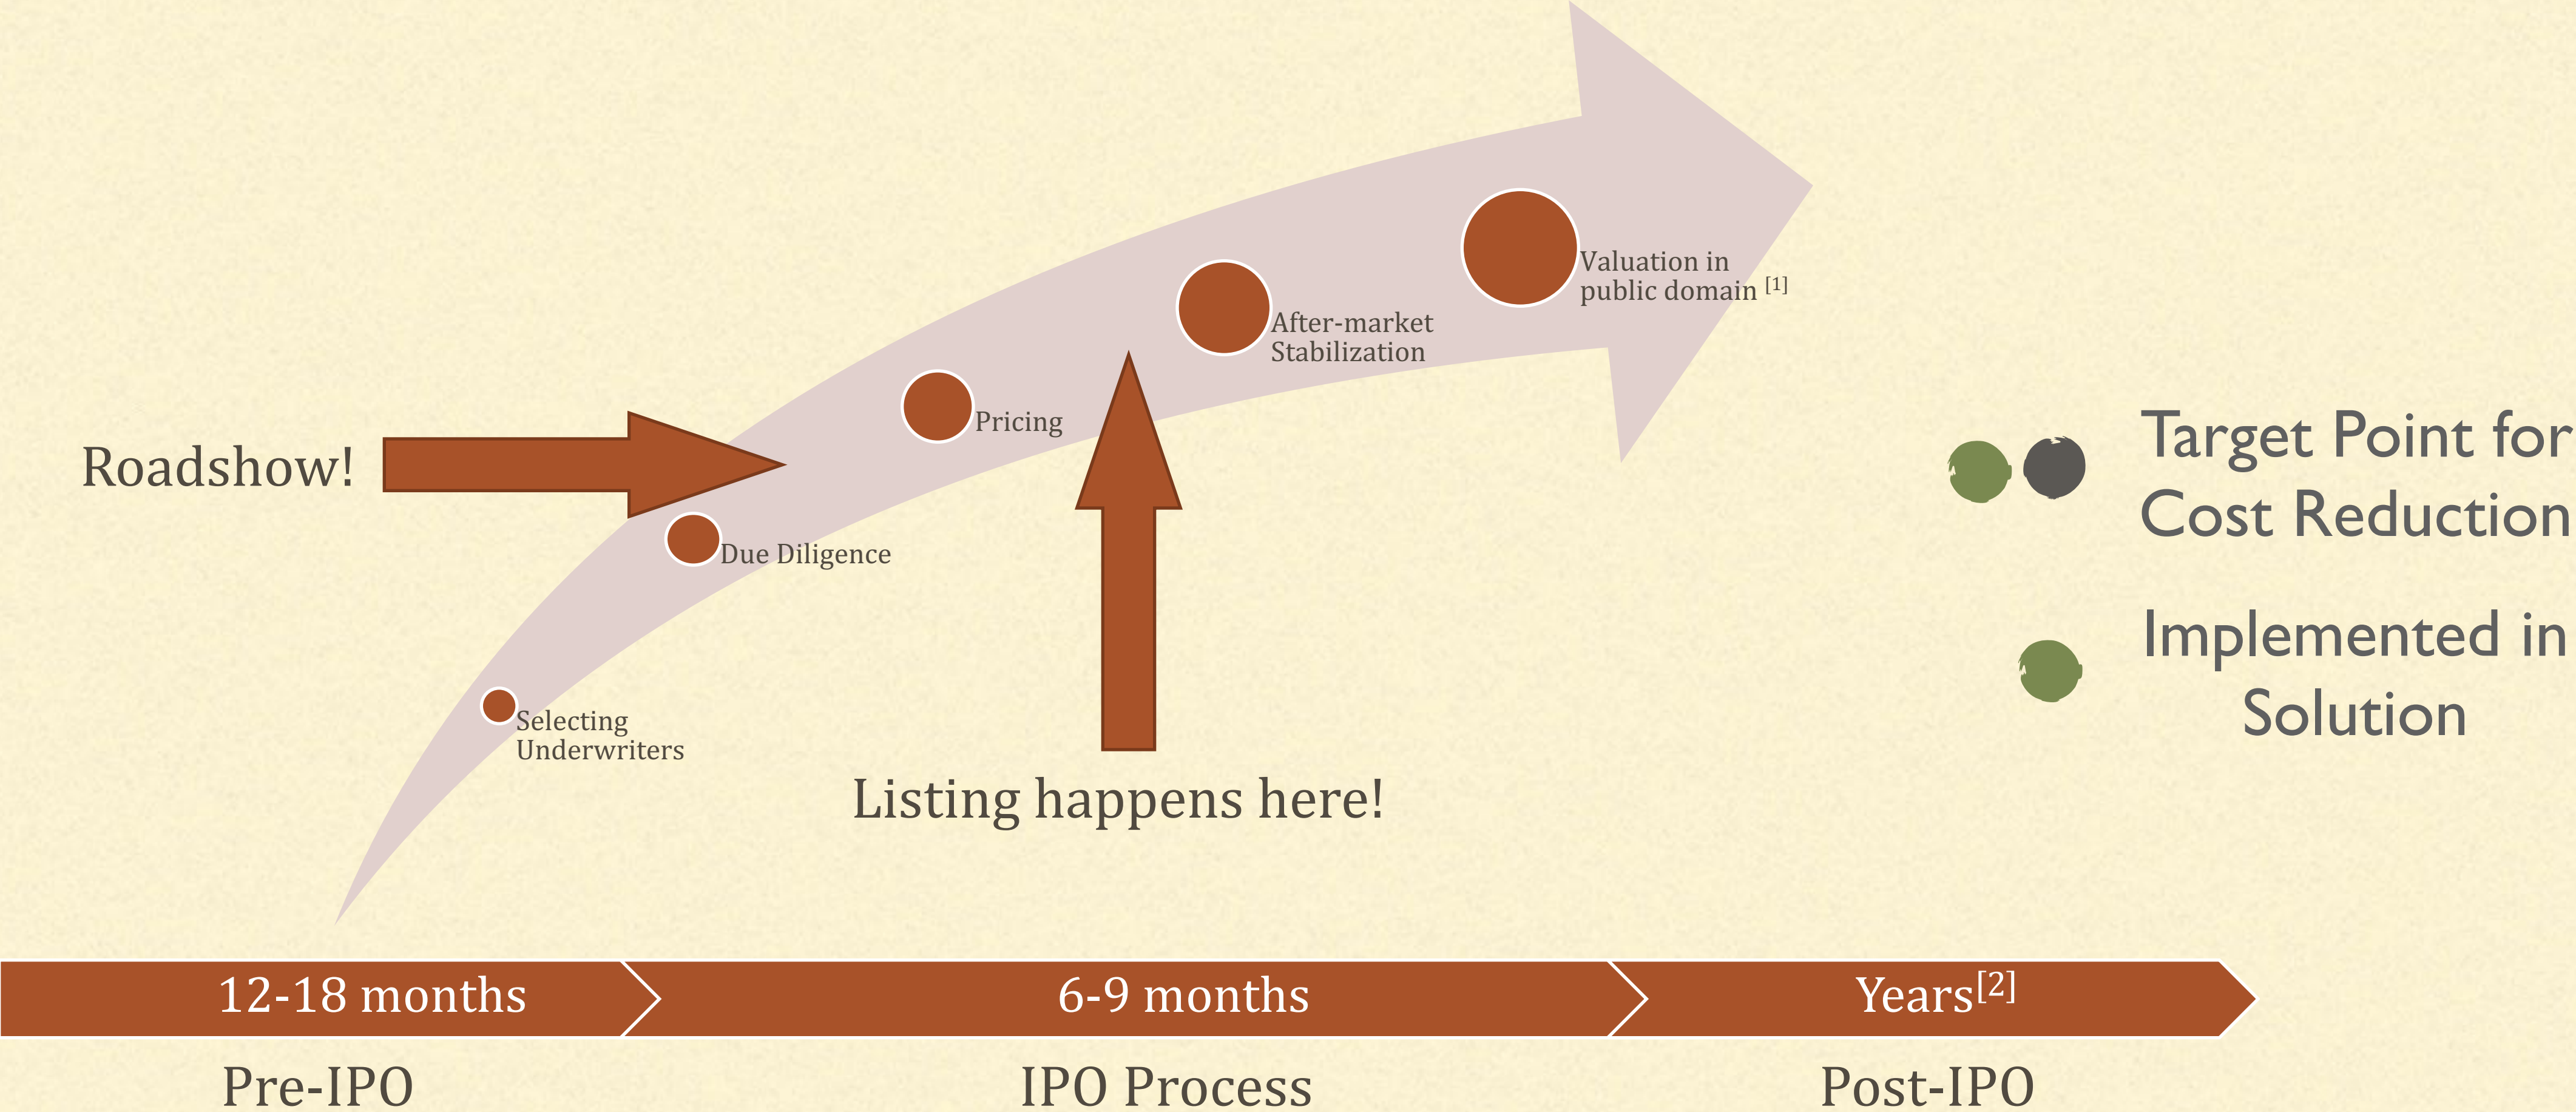

- IPOs are:
 - Expensive
 - Rely heavily on underwriter network
 - Very opaque
 - Traditional

■ Underwriting ■ Legal ■ Accounting ■ Printing

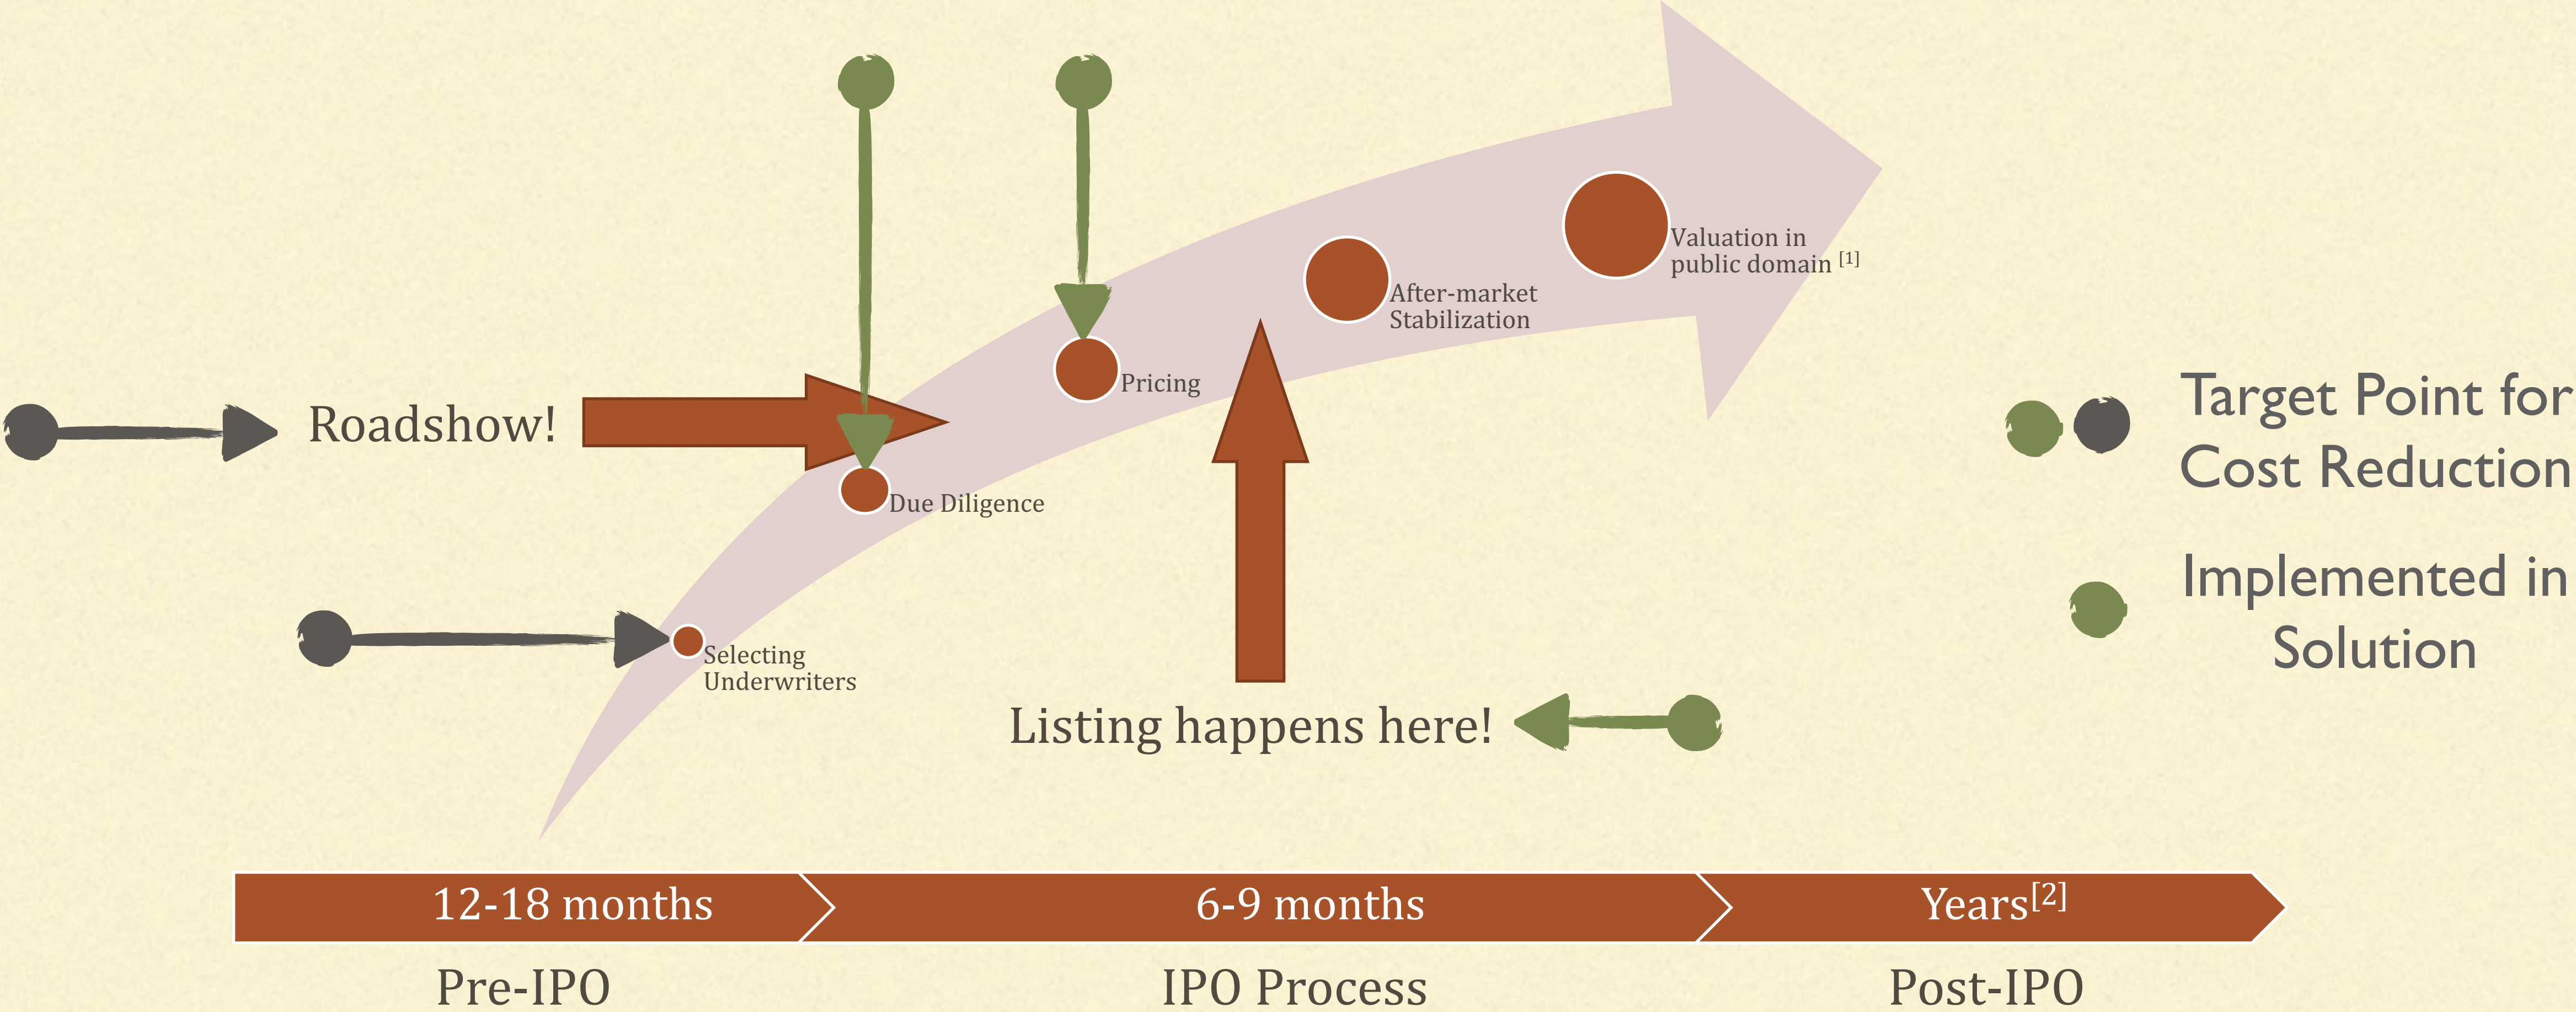

THE GOAL

Cost reduction by reducing dependency on third parties - specifically underwriters

COST REDUCTION

COST REDUCTION

FRAMEWORK AND METHODS

- Hyperledger!
 - Testing in playground on a local server
 - composer-rest-server for REST API
 - Implementation divided between “lifecycle” and “auction”
-

-

CHALLENGES

- *Front End* - One-way communication between Angular and REST server
 - Hyperledger interface - unfamiliarity with methods and syntax
 - The final application is inherently dependent on the network size.
-
